Junior Full Stack Developer with a strong focus on .NET backend development and relational databases. Experience building web and desktop applications using C#, ASP.NET, SQL Server, and Java. Solid background in layered architecture, REST API design, JWT authentication, and object-oriented programming best practices. Experience working collaboratively within agile teams.

PROFESSIONAL EXPERIENCE

No Country (Training Contract)

Remote

.NET Backend Developer

August 2024 – October 2024

- Developed backend features using C# and ASP.NET, applying layered architecture.
- Implemented REST APIs for managing core entities with full CRUD operations.
- Integrated authentication and authorization using JWT.
- Worked collaboratively under Agile methodology (Scrum), participating in planning, daily stand-ups, and reviews.
- Used Git for version control and team collaboration.

HIGHLIGHTED PROJECTS

Book Sales System – Arcadia

Academic Project

- Developed a complete book e-commerce platform using .NET and SQL Server.
- Designed a normalized relational database with over 30 tables and junction tables.
- Implemented layered architecture (Presentation, Business, and Data layers).
- Built JWT-based authentication and CRUD operations for books, customers, and orders.

Daily Planner – Logra

Personal Project

- Developed a personal organization application for managing tasks, notes, and mood tracking.
- Implemented the backend in .NET with a relational database.
- Applied layered architecture and separation of concerns principles.
- Designed data models focused on scalability and maintainability.

Loan Management System – Tu Crédito

Personal Project

- Developed a web application for loan management using Angular, ASP.NET, and SQL Server.
- Implemented REST APIs with CRUD operations for borrowers, loans, and payments.
- Designed a normalized relational database.
- Desarrollado con Angular, ASP.NET, SQL Server
- Integrated frontend and backend, ensuring data consistency and validations.
- Applied layered architecture and relational database design best practices.

EDUCATION

University Technical Degree in Programming – UTN

First year fully completed
GPA: 9.00 / 10

Córdoba, Argentina

February 2025 – Present

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET, Angular, JavaScript, HTML, CSS
Databases & Tools: SQL Server, MySQL, Git, Visual Studio, SSMS

LANGUAGES

English: Intermediate–Advanced | Spanish: Native
