Objective

Programming student seeking my first professional experience as a junior backend or fullstack developer, with interest in databases, .NET, and Java.

Education

UNIVERSITY TECHNICIAN DEGREE IN PROGRAMMING | UTN | 2025 – PRESENT

- Relevant courses completed: Programming I, Operating Systems Architecture, Business Organization, Mathematics I.
- GPA: 9.00 / 10

Projects

INVOICE MANAGEMENT API | UTN – ACADEMIC PROJECT

- Developed a C# library with SQL Server database access.
- Implemented stored procedures for query and update operations on transactional and support tables.
- Used ADO.NET along with **Repository** and **Unit of Work** patterns to ensure layer separation and maintainability.

BOOK SALES SYSTEM | UTN – ACADEMIC PROJECT

- Designed and normalized the database for a bookstore sales management system.
- implemented business logic in C# (WinForms, .NET) connected to the backend.
- Collaborated in a team of 4, applying version control best practices using Git.

VETERINARY MANAGEMENT SYSTEM | NO COUNTRY – COLLABORATIVE PROJECT

- Participated in end-to-end backend development using **Java** and **Spring Boot**.
- Implemented application security with **Spring Security** (authentication and authorization).
- Designed and consumed **REST APIs** following **Clean Architecture** and design patterns.
- Worked in an agile environment, contributing to sprint planning, code reviews, and product presentations.

Technical Skills

LANGUAGES & FRAMEWORKS:

C#, SQL, Java, .NET, Spring Boot.

DATABASES & TOOLS:

SQL Server, MySQL, Git, Visual Studio, SSMS.

Languages

- English: B2 – Upper Intermediate
- Spanish: Native
